GUIDE NOTES

(Not Part of Contract Document)

Specification G1 is to be prepared individually for each project in accordance with clause 2.3.2 of the Engineering Contracts Manual.

Bold italics and ~~strike-out~~ of text, as used for Model Specifications, are not to be used for TfNSW G1.

This template has been set up with manual heading styles so that, if the Specification is to be used for E tendering, the conversion to PDF format will include the clause numbers.

If any clause heading is not required for a specific contract, the heading is to be deleted and subsequent clauses re-numbered.

Clauses are to be included for any other general matters which are particular to the project, for example:

- Aboriginal archaeological site
- Pedestrian access and bus stops
- Community liaison
- Construction staging
- Anti-graffiti treatment
- Sources of local water
- Constraints on Contractor's activities
- Bonus payment
- Siting of batch plants
- Pricing options

If required, include job specific Pay Items in the Measurement and Payment clause following the format used in Model Specifications. If Pay Items are not required, delete the Measurement and Payment heading.

Complete, add or delete Annexures as required for job specific items.

After completing the specification, **delete these Guide Notes and preceding pages**, check the pagination of the whole document and insert page breaks if necessary to achieve continuity within Clauses. Then return to CONTENTS page to highlight and automatically revise listing and page numbers. Insert the last page number at the end of the CONTENTS.
