

## **BRIDGE POLICY CIRCULAR BPC2007/06**

### ***RTA STRUCTURAL DRAFTING AND DETAILING MANUAL***

#### **Background**

The RTA Structural Drafting Manual was originally developed for RTA in-house projects and for those managed directly by the RTA.

This manual has now been reviewed with the following objectives:

- Updating the information in the manual;
- Making the manual more relevant to external service providers and consultants and to projects delivered by various methods e.g. Alliances; and
- Bringing the manual into line where possible with Australian Standards.

Because the manual has been extensively reviewed and covers structural detailing as well as drafting matters it has been renamed the "RTA Structural Drafting and Detailing Manual".

#### **Information**

The RTA Structural Drafting and Detailing Manual is now available on the RTA's Internet site [www.rta.nsw.gov.au](http://www.rta.nsw.gov.au) at:

Doing business with us/Design reference documents/Structural Drafting and Detailing Manual

The direct link to the RTA Structural Drafting and Detailing Manual on the Internet is:

[http://www.rta.nsw.gov.au/doingbusinesswithus/designdocuments/structural\\_drafting\\_detailing.html](http://www.rta.nsw.gov.au/doingbusinesswithus/designdocuments/structural_drafting_detailing.html)

Updates of individual sections of the manual will be deployed onto the RTA's Internet site as soon as practicable, and will be advised on a quarterly basis (refer to BPC 2007/03).

#### **Action**

The RTA Structural Drafting and Detailing Manual supersedes the RTA Structural Drafting Manual and shall be used for the preparation of bridge and structural drawings for bridgeworks and structures for RTA and those that will become property of RTA.

**Reference:** BPC 2007/03

**Effective date:** 9/07/2007

**Approved:** **Wije Ariyaratne**  
**Principal Bridge Engineer**
