

Project		Prospect Highway Upgrade	
EPL Number		21295	
EPL Link		https://www.rms.nsw.gov.au/documents/about/environment/environmental-compliance/21295.pdf	
Licencee name		Roads and Maritime Services	
Licencee's address of premises		Prospect Highway between Reservoir Road, Prospect and St Martin Crescent, Blacktown	
Monitoring period		The site has not yet commenced operations	
Date Published	January 2020	Monitoring frequency required by licence	Special Frequency 1

Note: Special frequency 1 means:

- (a) Less than 24 hours prior to controlled discharge and daily for any controlled discharge; and
- (b) When rainfall causes a discharge from a basin which has not been emptied within 5 days of the cessation of a rainfall event.

Sampling point	Date sampled	Date obtained	Pollutant	Measurement	Limit	Units of measure
1. Pipe outflow to stormwater, which ultimately discharges to Blacktown Creek – West side of Prospect Highway	Nil	Nil	Total suspended solids	-		mg/L
			pH	-		pH unit
			Oil and grease	-		Visible
2. Pipe outflow to stormwater, which ultimately discharging to Blacktown Creek – East side of prospect Highway	Nil	Nil	Total suspended solids	-		mg/L
			pH	-		pH unit
			Oil and grease	-		Visible
3. Discharge to surface water, which	Nil	Nil	Total suspended solids	-		mg/L

is directed to Blacktown Creek – Northside of Great Western Highway			pH	-		pH unit
			Oil and grease	-		Visible

- No monitoring data is currently available for this project as the site has not yet commenced operations.
