

## Project complete at Showground Road, Castle Hill

Transport for NSW has completed the essential upgrade of Showground Road at Castle Hill.

*The newly upgraded Showground Road eastbound at Kentwell Avenue*

Showground Road is now two lanes in each direction between Windsor Road and Old Northern Road and is providing safer and more reliable journeys for road users in the Hills District

Transport for NSW completed Stage 1 of the Showground Road upgrade between Carrington Road and Kentwell Avenue in 2018. The section between Kentwell Avenue and Pennant Street was initially included in the original project. However, we carried out this part of the upgrade separately while we worked to understand the extent of development proposals in the area, particularly Castle Towers.

This final part of the upgrade is now complete and the entire upgrade is open to traffic. As part of the upgrade, the access between Kentwell Avenue and Showground Road is permanently closed to maintain safety and traffic flow.

Transport for NSW would like to sincerely thank road users and the community, particularly the residents and businesses on Showground Road, for their patience while we completed this essential upgrade.

### What did we do?

Our work included:

- widening Showground Road to four lanes between Kentwell Avenue and Pennant Street with

additional turning lanes

- providing additional turning lanes at the Showground Road and Pennant Street intersection
- installing new traffic lights and increase safety at the intersection of Showground Road and Cheriton Avenue
- providing new footpaths on both sides of the road.

## Community benefits

The upgraded Showground Road is now:

- reducing congestion
- increasing traffic capacity to meet the predicted growth from development in the area and
- improving safety for all road users.
