BUILDING OUR FUTURE

July 2021

Pause to construction activities on the Devlin Street improvements project

In line with new restrictions introduced by the NSW Government, work on the Herring Road improvements project will be paused until after 30 July 2021, or as otherwise advised by NSW Health.

We are making arrangements to ensure our sites are closed up safely and securely, as quickly as possible.

From Monday 19 July 2021 you may see our teams on site to implement essential environmental protection, safety and security measures. This work will involve securing our compound site at 166a Epping Road, North Ryde and throughout the project area.

We will make every effort to minimise the time our workers spend on site. Under the latest Public Health Order, and as detailed on the Infrastructure NSW site, urgent works are permitted.

Our crews will comply with all NSW Health COVID regulations while they carry out these urgent works, and traffic control will be on site for driver and pedestrian safety.

We will continue to monitor emails and the project information line and our teams will be available during standard construction hours to answer any questions.

We thank you for your patience and hope everyone stays safe over the next two weeks.

Questions? Contact our team on 1800 923 330 or email DevlinStUpgrade@christiecivil.com.au

Kind regards,

The Devlin Street Improvements Team
