BUILDING OUR FUTURE

June 2018

Establishment of a temporary ancillary facility for M1 Motorway upgrade between Kariong and Somersby interchanges from Thursday 28 June

The Australian and NSW governments are funding the upgrade of the M1 Pacific Motorway between Kariong and Somersby to improve traffic flow and safety.

The Kariong to Somersby M1 Pacific Motorway widening forms part of the M1 Pacific Motorway Upgrades, providing safer and more reliable trips for freight, people and businesses.

Roads and Maritime Services awarded a contract to Fulton Hogan Contractors to rebuild and widen the motorway and upgrade three of the four ramps at the Kariong interchange.

Major construction has now started and as part of this work, an ancillary facility is required to stockpile material and provide concrete for the pavement works. Establishment of this facility will include earthworks, spray sealing, placement of site amenities, construction of a retaining wall, plant and equipment deliveries and a crane to erect the vertical storage silos of the batch plant. See map overleaf for location of the site.

When the facility is established, day-to-day operations will include:

- batching and crushing concrete
- stockpiling of sand and aggregate
- material deliveries
- excavator operation and washout bays
- refuelling and maintenance of equipment.

The facility will operate between **6am** and **8pm** from **Monday** to **Friday** and between **7am** and **5pm** on **Saturday**. Any high noise impact work will be restricted from **7am** to **6pm Monday** to **Friday** and **8am** to **1pm** on **Saturday**.

How will the work affect you?

Work to establish the ancillary facility will start on 28 June 2018 and will be in operation until late 2019.

There will be some noise associated with work at the facility and every effort will be made to minimise noise impact, including:

- use of non-tonal reversing beepers on all machinery
- turning off equipment and vehicles when not in use
- placing site buildings and long term stockpiles to minimise noise from site
- directing noise generating equipment away from residential properties where possible.

Measures will be in place to minimise dust including management of stockpiles, the batch plant and all material transported to and from the facility.

Traffic changes

There will be no changes to the existing traffic arrangement in this area, however there will be an increase in light and heavy vehicle traffic to this facility during hours of operation. Vehicles will travel along Pile Road to Somersby Falls Road and then on to Wisemans Ferry Road to access the motorway.

Contact

If you have any questions or concerns, please contact our construction partner, Fulton Hogan on 1800 841 778 or email M1K2Sinfo@fultonhogan.com.au.

More information about the M1 Upgrades can be found online at rms.work/M1Upgrades.

Thank you for your patience during this important work.
