

Mosman Bay ferry wharf upgrade

MARCH 2014

The new wharf

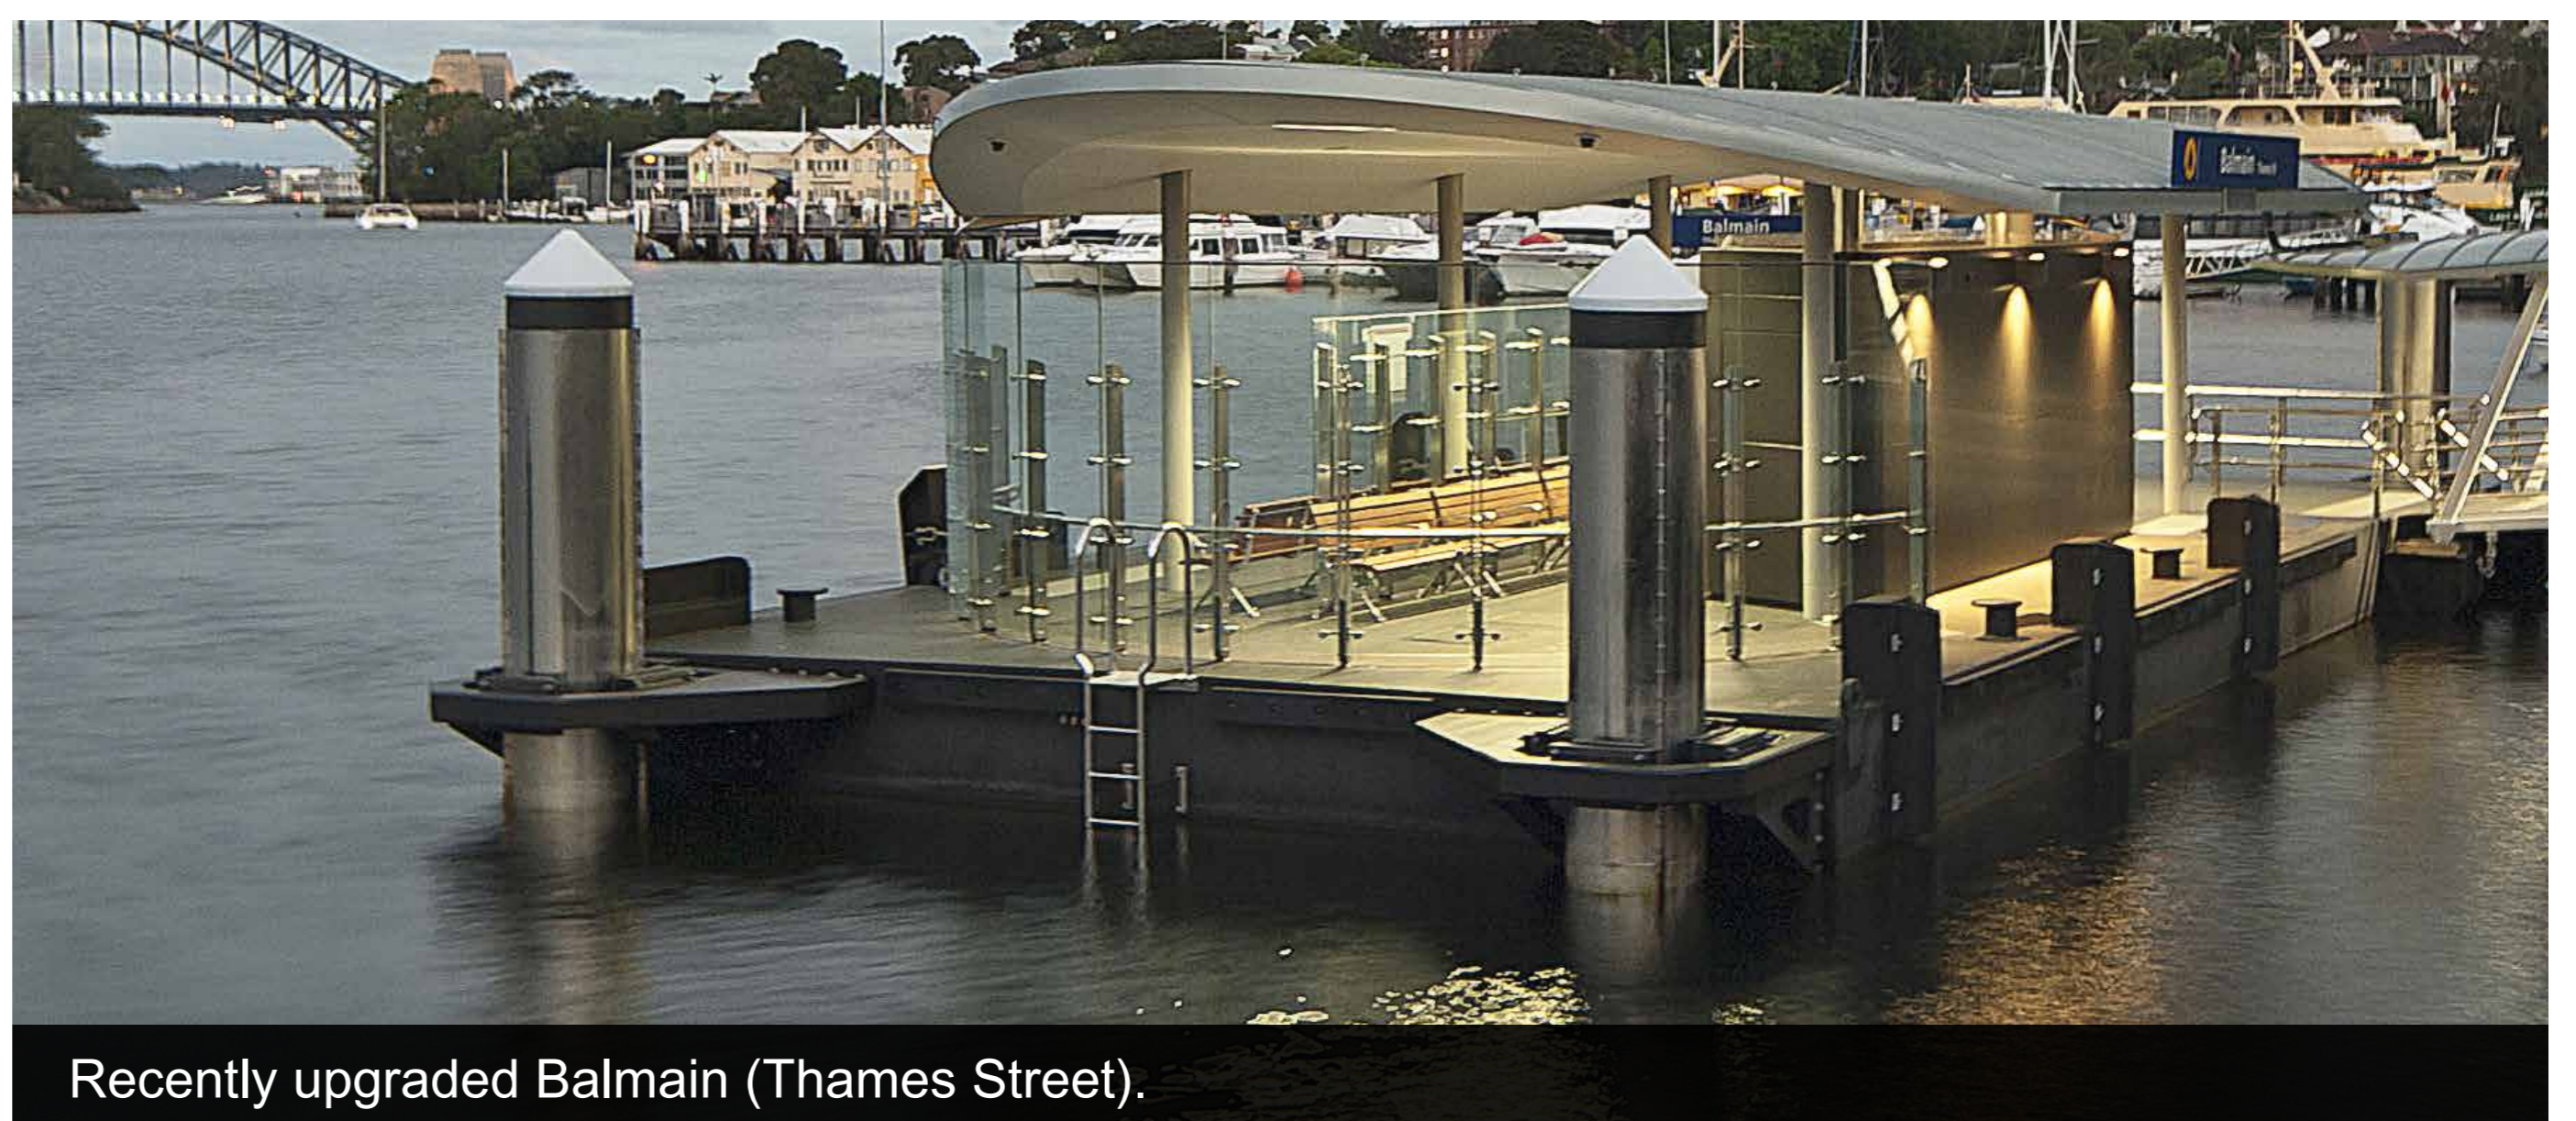

Artist's impression of the new Mosman Bay Wharf viewed from the water.

The new wharf will utilise existing structures with the retention of the waterside building and refurbishment of the existing pontoon. A new longer aluminium gangway and concrete ramp will be installed.

Work will also include the replacement of the eight piles holding the pontoon in position and the installation of two new piles supporting the new ramp and gangway.

The gangway and pontoon will have a curved roof which will shelter passengers from the weather. New glass screens and seating will provide improved comfort and amenity. The new sections of the wharf will look similar to the recently upgraded wharves in the Ferry Wharf Upgrade Program including Neutral Bay and Balmain (Thames Street).

Accessibility for passengers using mobility aids and passengers with prams will be improved with the pontoon, gangway and ramp designed to meet current access standards.

Recently upgraded Balmain (Thames Street).
