BUILDING OUR FUTURE

New England Highway Bypass of Scone

Construction update – January 2020

The New England Highway bypass of Scone will improve traffic flow, travel times and safety for road users.

Aerial view looking east showing completed road construction along St Aubins Street connecting with Aberdeen Street

Recently completed work

The project team has finished installing stormwater drainage on the bridges and the transparent noise barrier on the eastern side of Parsons Gully bridge.

The concrete structural work for all three bridges is complete and ready for the final asphalt road surface.

Street lights have been turned on at the southern interchange while the lights at the St Aubins Street and northern intersections are expected to be turned on in the coming months.

We've been installing road signs, permanent barriers and placing the final asphalt road surface.

Completed noise barrier on the bridge over Parsons Gully

The northern intersection showing the existing highway at top

Upcoming work

Planned construction activities include:

- Night work at the southern interchange to replace asphalt on the existing New England Highway
- Finishing the southern U-turn bay
- Installing road signage
- Completing road work at the southern and northern connections with the New England Highway
- Continuing to plant trees and grasses and carrying out watering to establish vegetation
- Completing the pedestrian path from the golf club to the golf course under Parsons Gully bridge
- Rehabilitating temporary site compounds.

Work hours

During January we will be working at night between **6pm** and **7am** from **Monday to Friday** at the southern interchange. We will continue to work between **7am** and **6pm** from **Monday to Friday** and between **8am** and **1pm** on **Saturday**.
