

# Intersection improvements on the Princes Highway, Rocky Point Road and Gray Street, Kogarah

## Project update – consultation outcome and start of work

Roads and Maritime Services | February 2018

Roads and Maritime invited feedback in October 2017 on a proposed night work construction schedule to improve the intersections of the Princes Highway, Rocky Point Road and Gray Street in Kogarah.

This project aims to improve the efficiency of the intersections, providing reliable journey times for motorists and improved safety.

### Night work construction schedule consultation outcome

We have decided to proceed with the preferred option to work up to **five nights** a week for a **12 week period** to complete the work as quickly as possible with minimal disruption.

### Start of work

Roads and Maritime Services will be constructing these intersection improvements to improve traffic flow and safety.

Work includes:

- restricting both right turns into Gray Street northbound and southbound from the Princes Highway
- amendments to existing medians to allow for three through lanes southbound on the Princes Highway
- installing new signage to advise road users of the alternate routes to access Gray Street
- implementing a 'No Stopping' zone on Gray Avenue to allow for safer turning movements from Rocky Point Road into Gray Avenue

- implementing a 'No Stopping' zone between 6.30am to 9.30am and 2.30pm to 6.30pm, Monday to Friday, to improve traffic flow
- minor trimming of two trees on Gray Avenue to improve line of sight for vehicles
- installing four new pram ramps at the intersection
- connecting a section of footpath on the south-east corner at the intersection
- minor street lighting adjustments to allow for increased visibility for motorists at night
- diamond grinding work to preserve and improve the road surface
- new signage and line-markings.

### How will the work affect you?

Our work may be noisy at times but we will do everything we can to minimise its impact, including completing the noisier activities by **midnight**.

Diamond grinding road work will be carried out over two night shifts. Local residents may experience some noise impacts and will be notified prior to this activity being carried out. One night's break from noisier activities will be provided following night shifts that include diamond grinding road work. A Review of Environmental Factors has been carried out in line with this work.

### Our work schedule:

We will be on site for **60 shifts** between **Friday 23 February** and **Wednesday 5 September**, weather permitting, excluding public holidays. Our work will be between **8pm** and **7am** from **Sunday** to **Friday**.

## Traffic changes:

There will be temporary traffic changes during our work hours to ensure the work zone is safe.

Lane closures will be in place and may affect travel times. Please keep to posted speed limits, follow signage and follow signs and traffic controllers' directions. For the latest traffic updates, you can call 132 701, visit [livetraffic.com](http://livetraffic.com) or download the Live Traffic NSW App.

Access to bus stops may be affected during shift hours but traffic controllers will be on hand to direct you to temporary stopping points nearby.

## Permanent alternative routes:

Electronic message signs will be in place during the work to direct motorists to the new routes to alternatively access Gray Street via Jubilee Avenue (northbound) and Rocky Point Road (southbound).

St George Hospital can be accessed via Gray Street and Rocky Point Road (southbound).
