April 2013

Dear resident/business operator,

Re: Inspections and survey work for the Windsor Bridge replacement project - commencing 8 April 2013

Roads and Maritime Services (RMS) is planning inspections and survey work as part of our continuing design development for the Windsor Bridge replacement project, on **8-12 April 2013**, weather permitting.

These activities will be carried out on the northern and southern banks of the river near the bridge, and within Thompson Square.

Work will be undertaken during the day, between **7am and 6pm**, on **8-12 April 2013**, weather permitting.

To minimise the impact on traffic, surface level surveys at the intersection of Bridge and George streets, Wilberforce and Freemans Reach roads, and the existing southern bridge abutment near The Terrace will be undertaken at night, from **7pm to 5am** on **8-9 April 2013**, weather permitting. Some traffic delays will be experienced during these investigations.

While the inspections and survey equipment do not generate noise, there may be some noise from generators associated with this work. RMS will however, continue to make every effort to minimise disruption to nearby residents and businesses.

Information regarding these activities, including any lane closures or speed limit changes, will be displayed on electronic message signs along the roadway. If required, pedestrian diversions will also be clearly marked.

RMS apologises for any inconvenience these activities may cause and appreciates the patience of residents and motorists. RMS welcomes any queries you may have regarding this work.

Please contact the project team on 1800 822 486 during business hours or by email to Windsor_Bridge@rms.nsw.gov.au.

Yours faithfully,

Roy Surace
Project Development Manager
