

Windsor Bridge replacement project

Construction update – November 2019

Major work is continuing on the new Windsor Bridge to help improve traffic flow and provide a safe and reliable crossing over the Hawkesbury River at Windsor.

The Bridge is now fully launched across the river

Work to be carried out in **November 2019** includes:

Bridge construction

Concrete work will continue at each abutment to complete the bridge approaches.

Work will start on the southern side of the river to install barriers on the eastern and western retaining walls, and a decorative brick cladding on the façade of the eastern retaining wall.

Our floating pontoon will remain in place during this work.

We have now removed the temporary set up for the bridge construction on the northern side of the bridge.

We are continuing work to backfill the northern and southern bridge approaches.

Utility relocations

We are continuing to upgrade the existing sewer infrastructure between the north and south areas of the river. To complete this work, we will install new sewer infrastructure and connect it with existing sewers.

Along with backfilling on the southern approach, we are extending the water mains attached to the new bridge.

We will also remove an existing water main along the southern side of Wilberforce Road. Work will include ground investigations and preparations to connect existing customers to the larger existing mains.

There is ongoing work for new underground cables along Bridge Street between Macquarie Street and George Street for new traffic lights.

Roadwork

Work to reinstate the footpath is continuing near the intersection of Bridge and George Streets.

This work involves roadwork and landscaping and will continue east of the new bridge from the intersection, downhill to The Terrace.

Work is ongoing for the new road alignment on the northern side of the river. During this time there will be an increase in truck movements.

Archaeology

Archaeologists will continue to work in the project area when required.

Our work schedule

Work will generally be carried out during standard construction hours between **7am** and **6pm** on weekdays and from **8am** to **1pm** on **Saturday**.

Out of hours work will continue into November along Bridge Street between Macquarie Street and George Street between **9pm and 5am Monday to Friday**.

There will also be some extended hours on **Saturdays** from **8am** to **4pm**.

How the work will affect you

There may be some noise and disruption associated with this work, including vehicle movements. We are making every effort to minimise noise and disruption to the community during construction.

We will continue to notify affected residents separately before any proposed noisy or night work.

Traffic Changes

Temporary traffic changes (including lane closures, road closures and detours) will be in place to ensure the work zone is safe. Please follow the direction of traffic controllers and signs.

For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.

Contact

Please contact us on 1800 983 657, email windsorbridge@georgiou.com.au or visit rms.nsw.gov.au/windsorbridge.

Thank you for your patience during this important work.

Please note: The **Hawkesbury Paddle Wheeler** continues to operate and is picking up and dropping off passengers from a temporary location at **Governor Phillip Park boat ramp wharf**.
