

# Windsor Bridge replacement project

## Construction update – February and March 2021

The new Windsor Bridge and upgraded intersections are now providing a safe and reliable crossing over the Hawkesbury River at Windsor.

*Aerial view of the new Windsor Bridge, upgraded George & Bridge streets intersection and progress work on unified Thompson Square*

Work will continue over the next few months to complete the project and open the upgraded Thompson Square to the community. The following work will take place.

### Landscaping

On the northern side of the river, we will complete landscaping along Wilberforce Road and Macquarie Park Access Road. We will also complete landscaping along The Terrace on the southern side of the river.

### Thompson Square

The top section of Thompson Square has reopened to the public after landscaping and construction was completed. We appreciate the patience and understanding of the community while we have completed this work.

We have installed new street lights along Bridge Street and will open the full park in the coming months once all work is completed.

## Roadwork

We will start building a new road surface pavement on The Terrace. This will involve asphaltting and installing a decorative concrete pavement.

## Structures

The concrete structures for the new viewing platform on The Terrace will be completed in this next stage. This will include installing pavers, handrails and street furniture.

We will construct the northern viewing platform immediately after we finish the current work to remove the Old Windsor Bridge.

### Existing bridge removal

We are continuing work to remove the existing bridge piers. This work remains challenging and contains many variables that impact how effectively the process occurs. We are refining and modifying the removal techniques to suit the conditions.

The bridge removal is being carried out under the approved Environment and Safety Management Plans which include comprehensive water quality monitoring to help ensure this work doesn't negatively impact the surrounding environment.

The final stages of this work remains on track to be completed in the coming months, weather permitting.

The waterway generally remains open throughout the work with designated navigational passageways with temporary markers. During some activities, we temporarily close the waterway for public safety.

## Utility relocations

### Electrical

We will finish installing the electrical lighting in Thompson Square in the coming weeks.

### Water

We will complete the small water feeds required to provide services in The Terrace.

## Our work schedule

In line with the changes to standard construction hours during the Coronavirus outbreak, work will take place on all days of the week including Saturdays, Sundays and public holidays between **7am** and **6pm**.

We will not work every Sunday and public holiday, instead only as required.

## How the work will affect you

There may be some noise and disruption associated with this work, including vehicle movements. We are making every effort to minimise noise and disruption to the community during construction.

We will continue to notify affected residents separately before any proposed noisy or night work.

## Traffic changes

Infrequent traffic changes may occur from time to time to enable final work inspections and installed services and also to address minor repairs if required.

For the latest traffic updates, you can call 132 701, visit [livetraffic.com](http://livetraffic.com) or download the Live Traffic NSW App.

## Contact

Thank you for your patience during this important work.

Please contact us on 1800 983 657, email [windsorbridge@georgiou.com.au](mailto:windsorbridge@georgiou.com.au) or visit [rms.nsw.gov.au/windsorbridge](http://rms.nsw.gov.au/windsorbridge).

**The Windsor Paddle Wheeler** has reopened and is picking up and dropping off passengers from a temporary location at **Lower Portland Wharf**.
